

FORGINGS AND CASTINGS
REINOSA WORKS

STEEL ART

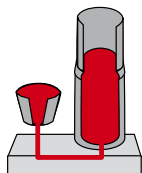

Cement

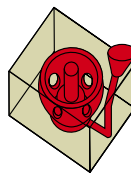

Gerdau is one of the main suppliers for the most important cement Engineering companies. Our pieces are critical because if for example a kiln tyre ring is damaged, that implies that the furnace stops and resulting in great losses

for the cement companies. Hence the criticality of our pieces and the need of the industry to work with premium suppliers like Gerdau. Additionally, Gerdau can produce subassemblies or roller and shaft assemblies.

Forging pieces

Casting pieces

Assembly of roller & roller shaft

Kiln tire ring

Kiln shell

Roller press shaft

Supporting roller

Mill head
